LaPorte Pit Quarterly Briefing

Current Activities

The county has granted us the building permit for the onsite main access bridge across the Little Cache Ditch. The bridge was installed late September.

Delivery of the concrete batch plant began in mid-September. All pieces will be stored onsite until building can begin.

There has been no other significant change in activity since the last briefing. LRM is still continuing to work with the county regarding permitting.

Next Briefing: January 2020

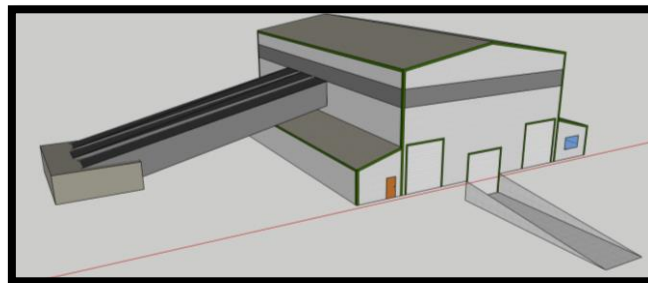

Other Activity

- Fencing along the west property line and 54G is underway.
- LRM is still in the process of answering final questions from the county.
- Timeline of site plant approval is still unsure.

Plant Building Change

As part of the review process with Larimer county the design of our plant enclosure building had to be changed.

A picture of the new building design is below.

Next Steps

Development Agreement, Development construction permits, and building permits with the county.

A copy of this pamphlet and the presentation from the briefing will be posted to our website under the Laporte Tab.

Other Next Steps

- Berm installation & landscaping
- Site grading
- Access road
